

# Travelling with powders, liquids, aerosols and gels on international flights

## AUSTRALIAN RESTRICTIONS

### What can I take on board?

- Organic powders (e.g food, powdered baby formula, coffee, sugar) are not restricted, but must be separated from the rest of your carry-on baggage for X-ray screening.
- Inorganic powders (e.g. salt, sand, talcum powder) must be in containers of 350ml (volume), 350gm (weight) or less. The total must not exceed 350ml, 350gm per person.
- Liquid, aerosol or gel items must be in containers of 100ml (volume), 100gm (weight) or less. These items must be placed in a 20cm x 20cm zip lock bag.
- Only one bag is allowed per passenger, with exceptions for carers who may carry the bag/s for people in their care, including children.
- Empty containers such as flasks or water bottles may be carried through the screening point.

For more details visit [homeaffairs.gov.au/travelsecure](https://homeaffairs.gov.au/travelsecure) or talk to screening staff.
